

Automations that meet your security needs!

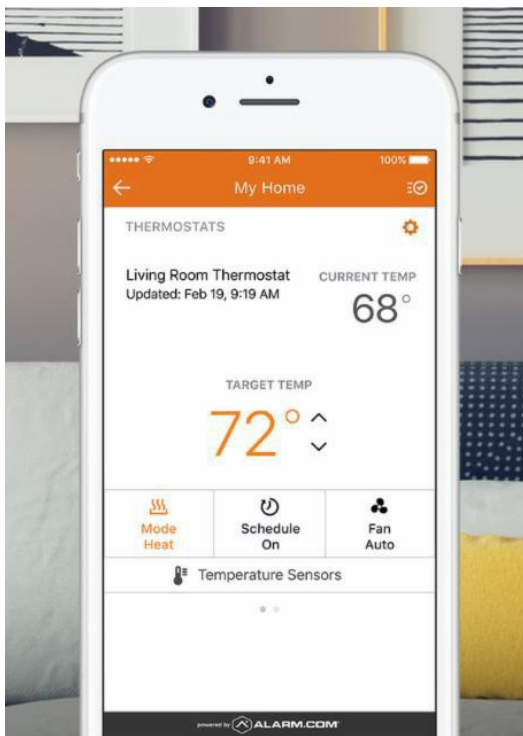

Turn on lights. Lock doors. Receive alerts when the kids get home. There are so many things you can do with a smart security system. Let Guardian Security assist you in protecting your loved ones as well as your residential and commercial properties with peace of mind!

Ready to do more with your system?

We install systems that offer smart home/office capabilities with cameras, z-wave automations, smart phone app interactivity, doorbell cameras, locks, lights, thermostats and more!

Your security consultant can meet with you to do a full system review and provide options and suggestions. We offer no-pressure, free, consultations!

Here are some examples of automation features you can achieve with Guardian

Monitor as well as raise and lower the temperature in your home or office.

Want the temperature to turn down when you have left in the morning? You can do that through your Alarm.com rules settings.

Turn lights on and off.

You can also setup a schedule and have rules in place that turn specific lights on when the alarm is tripped or when someone walks in front of your cameras.

Alarm Response with Guardian Security

Alarm Response is a subscription-based service that makes sense for many of our business owners and home owners, particularly those who travel, who have vacation homes that are unoccupied for long periods of time, or who have businesses that have predictable business hours. In all of these situations, an empty house or vacation residence, or the office after everyone has gone home for the day are vulnerable to break-ins and burglaries.

One answer to this is the security alarm system, and should the system go into alarm, whether you are out of town or home in bed, **Alarm Response** provides an on-site check to your property. Once Guardian receives the

alarm signal, a security guard is sent to physically check for suspicious activity or appearance. You or your designated emergency contact will still be called, but in the meantime, security can assess the situation and alert proper authorities should further action be taken.

Speak with a *Guardian Security Consultant* today to see if Alarm Response makes

When is the last time you reviewed and updated your Emergency Contact list?

You can contact us at any time and request a copy of your current call list! Once reviewed please submit call list changes directly to our Central Station team via our **Website** or **Email**

Sending update requests just to your sales consultant or a single Guardian employee may slow down the process if they are on vacation or unavailable.
