Did You Know?

Guardian Security offers video surveillance products that give you a view of your property when and where you want it.

Live streaming video can show you when the kids get home from school, who pulled into the driveway, or even check on your pets.

With interactive security services, you can set your system to begin recording when motion is detected, a door or window is opened, or an alarm is tripped. Video alerts can be sent to your phone as well, making this one of the most popular security layers available today.

Security: An Interactive Experience

Gone are the days of locking the front door, going off to work, and hoping for the best. With the latest in interactive security and home automation products, protecting your home or business property is an up-to-the-moment experience which puts power and control into the hands of the customer.

Guardian Security is proud to offer interactive security systems. Alarm.com, a Guardian product, received the CEPro Best Award for Energy Management and Home Automation Solutions, one of the highest recognitions in the industry. Features distinct to Alarm.com include the most advanced home monitoring technology: it is accessible by web or a mobile device, functional without a phone line or internet

connection, and monitors even when the system is disarmed. Alerts can be delivered by email or text, and video alerts can be configured as well.

In short, home automation means the customer can be in control, receive alerts, manage energy, and watch video of activity on the property in real time.

Customizable triggers mean a system can be completely integrated. Arming the system can trigger the front door to lock and the thermostat to adjust, for example. Disarming the system can trigger lights to come on, or the thermostat to adjust once again. Numerous combinations make the system fit the customer's lifestyle.

Interactive security saves time and money by putting control on your computer or phone.

Call today and see how to put it to work for you.

Yo-Ho!

Fred Scheer's
Lumberjack
Show

Fun for the
whole family!

If you've seen
it once, you
know the
script!

This exciting
show features
world
champion
lumberjacks as
they strut their
stuff and show
off their skills.

Blending sport,
education,
history, and
comedy, this
show is a
laugh for all
ages!

3 shows daily at
the Woodlot

See you at the
fair!

Fair Enough

Fair time is coming soon! **August 21-September 1**, thousands of Alaskans and visitors gather to enjoy turkey legs, pretzels, contests, and concerts. This year marks the 78th state fair. The very first fair, held in

1936, also marked the opening of the Knik River Bridge, connecting Anchorage to the Valley by road for the first time, and opening the way for visitors to attend from near and far. A long-held tradition,

the **Giant Cabbage Contest**, began in 1941, and was won by Max Sherrod with a cabbage weighing 23 pounds.

This year, more than 3000 Alaskans will be performing, and many more will enter their agricultural goods, textiles, and art for exhibit. There will be a **jousting** competition, a dinosaur exhibit, **reptiles**, and an acrobatic

Ned Hahn started Guardian Security in 1974 with a drill purchased on credit. From humble beginnings, Ned has grown Alaska's only full-service, locally owned and operated security company into the largest local security company in Alaska by scouting out and offering the most innovative, effective and efficient security solutions for Alaskan homes and businesses.

performance. The concert lineup includes Michael W. Smith, and a few of the characters from Duck Dynasty. Guardian has a long tradition of meeting and greeting customers old and new inside a **fully operational booth**.

This year, Guardian is offering a drawing for airline miles! To celebrate our 40th year in business as Alaska's locally monitored security company, and to

thank our customers for their continued loyalty, **current customers** are invited to drop their names in the hat for a chance to win 40,000 miles from Alaska Airlines!

In addition, We are offering a **Daily Giveaway** for our current customers. Every day, we'll draw a winner for three months of basic monitoring, free!

Technology at Your Fingertips

Want to hear about Z-wave? Home automation? How to get your doors to remotely lock or unlock? Want to see, touch, and learn more about the most current technology in home security?

Come by Guardian's fair booth. Keypads, touchpads and more line the walls of our fully powered demo station.

Come by for a test drive. Our knowledgeable staff is ready to show you the cutting edge trends available in **security alarm systems, integrated security, and home automation. See you at the fair!**

Contact List: Current?

For the best protection of your premises, Guardian must have an up-to-date Emergency Contact List on file. Make sure everyone is trained in the use of your system.

Take a moment to update your Emergency Contact List so we know whom to contact in the event of an alarm.

Go to guardiansecuritysys.com/support/update-emergency-contact-list/ to update. You're also welcome to stop by our Central Station.

*Please note: It is our policy to verify requests by phone before implementing them. Please allow 72 hours for changes to take effect.

We're here to serve you!

The Next Wave: Z-Wave

The reds are running, so you grab your dipnets and hop in the car. Halfway there, you realize you've forgotten your waders. Your buddy offers to stop by and get them on his way out of town. You pull out your cell phone, disarm your security system, and open your garage door. He grabs your gear, you secure your home once again, and your plans haven't changed.

But how? The short answer is Z-Wave. Z-Wave is a wireless technology that makes regular household products 'smart'. "Z-Wave products 'talk' to each other wirelessly and securely and can be accessed and controlled on your

phone, tablet or pc" (z-wave.com). Here's how it works:

Z-Wave allows you to remotely connect with your home and gives you control of doors, locks, lighting, heating, and more. This can be done from anywhere inside the home, or while you're away via the internet.

Guardian offers the convenience of full home automation and the confidence of monitored security within one easy app.

Check out what's new at our fair booth or by calling our office!

Extreme Temperature Triggers

Extreme Temperature Triggers automatically adjust for extremely high or low temperature predictions for your area. No more money wasted on unnecessary heating: Just enter your guidelines for the system should certain temperatures be reached. Learn more at <http://www.alarm.com/productservices/energymanagement/extreme-temps.aspx>

Keyless door locks are the smartest way to protect the primary entrances to your home. A door lock that uses Z-wave technology can connect with a Z-wave supported security system, and you can use your lock in three ways:

The conventional method to lock or unlock the door, using a key.

The numerical pad, which can be set to any code you wish. A code can be set for each lock or for each family member. You'll receive a notification when the code has been used or when an incorrect code has been attempted.

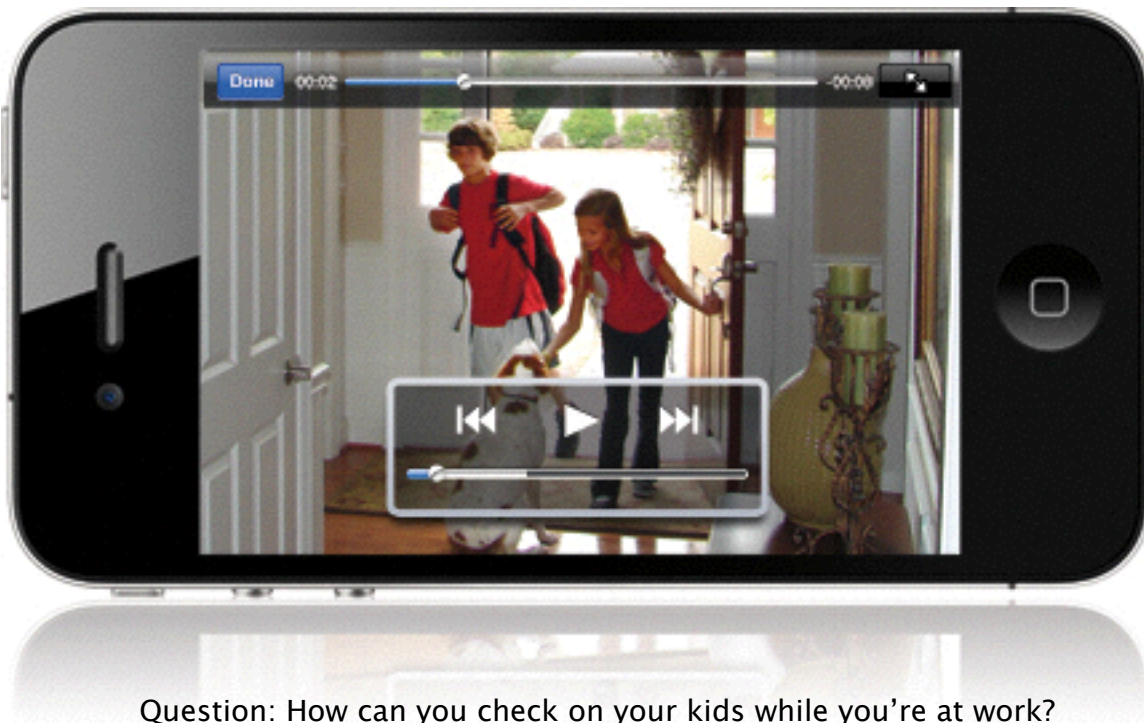

Remote door-lock. Check the status of your doors using your computer, tablet, or smartphone. Lock and unlock for family and

friends. By use of an app, this can be done from virtually anywhere in the world with an internet connection. The motor-driven deadbolt latch ensures truly remote locking and unlocking.

Burglars prefer quick, easy entry. Smart door locks protect against lock bumping as well. Bumping a lock is one method utilized by criminals to gain entry to a locked door. New lock technology incorporates strong protection against this.

Your first line of defense is a Guardian Security sign on prominent display. Your second is strong locks at each entryway. When upgrading your home for sale or for personal preference, consider installing smart door locks.

Question: How can you check on your kids while you're at work?

Answer: Interactive Security. Available from Guardian.
